Professional Summary

Full Stack Core Infrastructure Engineer with experience developing React-based tools, scalable backend services, REST APIs, automation workflows, and cloud infrastructure systems at Oracle Cloud Infrastructure. Strong foundation in data structures, problem solving, JavaScript, TypeScript, React.js, Java, Python, PostgreSQL, Redis, Docker, Kubernetes, Git, CI/CD, and production debugging. Experienced in building maintainable applications, improving service reliability, scaling infrastructure, and using modern engineering workflows to deliver features quickly across frontend, backend, and cloud environments.

Education

National Institute of Technology Karnataka, Surathkal (NITK)

June 2020 – May 2024

Bachelor of Technology in Information Technology

CGPA: 8.62/10

Experience

Oracle Cloud Infrastructure

May 2024 - Present

Software Engineer

Bengaluru, Karnataka

- Develop SmartNIC microservices for Bare Metal Cloud, enabling secure, high-performance OCI virtual networking.
- Built an end-to-end canary for a core OCI service, improving outage detection and reducing MTTR by 40%.
- Scaled multi-region infrastructure to support 2x traffic growth within 24 hours during a major customer traffic event.
- Automated security patching across services, reducing manual effort by 50% and saving 40 hours per month.
- Built single-SmartNIC provisioning workflows, reducing operational effort by 20% and saving 60 hours per month.
- Redesigned asynchronous API processing, using worker-request design to eliminate timeout issues in large-scale regions.
- Designed and developed scalable internal UIs used by 40+ engineers, streamlining on-call and operations workflows.

Oracle Cloud Infrastructure

May 2023 - July 2023

Software Engineer Intern

Bengaluru, Karnataka

- Built an approval-driven Service Mapper workflow for Oracle Cloud Infrastructure tenancy accounts, enabling controlled request, review, and approval flows.
- Supported rollout of the workflow across 40+ Oracle Cloud internal customer teams.
- Built a UI for controlled request and approval flows, improving auditability for service and SKU mapping changes.
- Increased unit test coverage for critical OCI workflows from 66% to 71% using JUnit.

Projects

Bus Ticket Booking System | *Python, Django, React.js, PostgreSQL, Redis, REST APIs*

GitHub

- Built a full-stack ticket booking platform with route search, seat selection, user login, and booking history.
- Developed Django REST APIs for bus routes, trip schedules, seat availability, bookings, and cancellations.
- Designed PostgreSQL schemas with transaction-safe seat locking to prevent duplicate ticket reservations.
- Cached frequent route and schedule searches using Redis to reduce database load and improve response time.

Technical Skills

Languages: C++, Java, Python, JavaScript, TypeScript, Terraform, Go

Backend: Spring Boot, Hibernate, REST APIs, Ruby on Rails, GraphQL, Kafka, Redis, CI/CD, Agile, Prometheus

Frontend: React.js, Next.js, Tailwind CSS

Databases and Cloud: MySQL, PostgreSQL, MongoDB, Oracle Cloud Infrastructure (OCI), Docker, Kubernetes

Achievements

- Coding Profiles: Codeforces Specialist 1438, CodeChef 4-Star 1840, LeetCode Max Rating 1818.
- Secured All India Rank 347 and State Rank 2 among 500,000 students in NSTSE 2019.
- Secured All India Rank 4,485 among 1,000,000 students in JEE Main 2020.
- Selected as a finalist among 20,000+ participants in AICTE Innovative India Coding Championship 2022.
- Secured rank 1,595 among 28,000+ participants in LeetCode Weekly Contest 481.
- Secured rank 614 among 30,000+ participants in Codeforces Round 898.
